

Impact Investing Principles for Pensions

Adopter's statement for investment consultants and fiduciary managers

Impact Investing Principles for Pensions

I / we endorse the Impact Investing Principles for Pensions and will:

1. routinely include impact investing as a key topic for consideration with both new and existing pension fund clients;
2. support pension clients in reviewing the environmental, social and governance impacts across their investment portfolio and provide recommendations;
3. support pension fund clients to set impactful objectives and interim targets, implement their strategy, and manage and monitor their investments in relation to their impact objectives by providing effective tools; and
4. support pension fund clients to make changes to their objectives, investments and third-party advisers and investment managers based on their management, monitoring and review of progress.

I / we will be able to demonstrate action in one or several of these areas within six months of adopting the Principles and will recommit on an annual basis with evidence for how the Principles have been used.
